## **GENESIS COMMENCES DRILLING AT THE LAS OPEÑAS GOLD PROJECT**

Genesis Minerals Limited (ASX: GMD) ('Genesis' or the 'Company') is pleased to announce it has commenced drilling at the Las Opeñas precious and base-metal epithermal project ("Las Opeñas" or "the Project") located in the pre-cordillera of San Juan Province, Argentina.

The 2,400m Phase 2 drill program will test the main zone of extensive surface gold- and base metal mineralisation, coincident with a breccia system and Induced Polarisation features.

The Company expects drilling to be completed in the first half of July with first results anticipated in late July.

Early in 2014 Genesis renegotiated the Las Opeñas agreement with Teck Argentina Ltd ("Teck") (see GMD ASX Release dated March 21, 2014). Genesis will complete a minimum of 2,400m of drilling at Las Opeñas by September 30, 2014. During this period Genesis will retain its 100% interest in the Project while Teck will retain its right to earn-back in to the Project.
